Jean-François Gutierrez

AI Solution Architect | Head of AI & Tech @ GenAI Summit EU | fran-ai.dev

Valencia, Valencian Community, Spain

Summary

I'm Fran. I build with AI, and I help companies actually figure out what to do with it. I sit with teams, untangle their mess, and ship stuff that scales (strategy, governance, real architecture, not slideware), and I consult at LIDR doing the same kind of work. On top of that I'm Head of AI & Tech at the GenAI Summit EU, which is basically the applied AI conference in Europe. I handle the agentic systems and all the tech behind it. Before that I was at kluster.ai, deep in the trenches of the whole "AI writes your code, now what" problem. We built tooling to verify AI generated code and plugged it into pretty much every IDE people actually use: Cursor, VS Code, Claude Code, Windsurf, the lot. Fun fight. And before all the startup stuff I was inside the corporate machine at BASF as their AI Ambassador and AI Engineer. Drove adoption, built real things (one of them saved 20M+ in automation, and got an invention patent out of it), and learned how AI actually lands in a giant org versus how LinkedIn pretends it does. These days I'm chasing AI Solutions Architect and AI Consultant roles. Less "me writing code in a corner," more figuring out the right thing to build and making it happen. Want the receipts? fran-ai.dev. Hit me up for advisory, talks, workshops, or sponsoring the GenAI Summit.

Experience

Gen AI Summit EU

Head of AI & Technology

March 2026 - Present (7 months)

Valencia

GenAI Summit EU is the reference applied-AI conference in Southern Europe. A sold-out international event for builders, AI engineers, founders, and enterprise leaders.

Technical program & content

- Curate the program across our 6 core tracks: autonomous agents and AI operating systems, next-gen infrastructure and frontier models, productization and GTM strategy, AI in critical industries (health, finance, logistics, e-commerce, manufacturing), security and compliance (AI Act, OWASP for LLMs, risk frameworks), and the future of work in AI-native organizations
- Moderate the Tech Lead Forum, our flagship invite-only track for engineering leaders, with closed-door panels on agentic systems in production, AI governance, and platform decisions facing CTOs in 2026

Platform & product

Led the move away from off-the-shelf SaaS to proprietary IP for event operations. A full event management platform built in-house, owned by MTP:

- Attendee onboarding, registration, and ticketing (replacing third-party checkout)
- Speaker and workshop management with self-service portals
- Networking app for attendees
- Sponsor hub for autonomous sponsor self-management-
- Real-time admin operations dashboard (Control Room) for attendee, workshop, and speaker management
- SEO/GEO architecture and blog infrastructure-

Achievements

2025 to 2026 growth (year-on-year):

- Attendees: +90% (183 to 352)
- International audience: +35 percentage points (12% to 47%)
- Speakers: ×2 (16 to 32)
- Sponsors: +71% (7 to 12)
- Workshops: new format introduced (0 to 5)

My Tech Plan

7 years 9 months

Chief Technology Officer

February 2026 - Present (8 months)

Valencia

What I lead:

- Agentic systems for internal operations
- Designed and shipped multi-agent workflows that automate roles and tasks across the company (content ops, attendee support, sponsor pipeline, post-event analytics).

AI governance

- Guardrails, evaluation frameworks, and decision boundaries for the agents running our operations.
- Product strategy, validation, and delivery across MTP's portfolio, from concept to launch.
- Tech and product design for all our digital surfaces
- Proprietary event management platform (attendee onboarding, ticketing, speaker and workshop management, networking app, sponsor hub, admin Control Room), SEO and GEO infrastructure, blog and content platform, analytics.
- Engineering hiring, technical partnerships, and platform architecture.

Artificial Intelligence Consultant

January 2019 - Present (7 years 9 months)

Madrid

Developing web solutions for small and medium businesses with a strong focus on StartUps.

-Gen AI Tailor Made Solutions:

- AI Agents
- Advanced RAG implementations
- Unstructured data extraction
- Optical Character Recognition (OCR)
- Speech-to-text and text-to-speech applications

Technical Proficiencies:

- Languages: Python, TypeScript
- Frameworks: Langchain, LlamaIndex, Autogen, PyTorch, Streamlit, FastAPI, Angular, Nextjs, Nestjs
- Cloud Platforms: AWS, AzureOpenAI, Google Cloud, Vertex, Hugging Face
- Providers: NVIDIA, Anthropic, AzureOpenAI, OpenAI
- Models: OpenAI, Anthropic, Llama3+, Nemotron, Mistral
- Tools: Docker, Kubernetes, Git, JIRA

LIDR.co | AI-Powered Careers

AI Implementation Strategist

May 2026 - September 2026 (5 months)

Valencia

Design and implement agentic AI architectures for enterprise software teams. Each engagement combines architecture design (agentic layer, tooling

selection, workflow integration) with hands-on implementation on the client's production codebase.

What I design and build:

- Agentic AI layer tailored to each client stack: Claude Code skills, MCP servers (Atlassian, GitLab, custom), hooks for governance, subagents for specialized workflows
- Spec-Driven Development workflows integrated into existing SDLC (Kanban / Scrum), without disrupting team velocity.
- Governance and guidelines for AI usage in production code: PII boundaries, code review automation, pattern enforcement.
- Metrics architecture: baseline (Lead Time, defect rate, reopens, IA-assisted PR ratio) and delta tracking through CI integration.

PaperMoon.io

Developer Relations at Kluster.ai

May 2025 - February 2026 (10 months)

Barcelona

I'm the DevRel for Kluster.ai – a real-time AI code verification platform that catches bugs in AI-generated code before they hit production. We're the only ones treating intent misalignment as a critical bug.

What I actually do:

- Build IDE integrations for VSCode, Cursor, Windsurf, Claude Code, Gemini CLI via MCP and native extensions
- Help developers catch issues through automated code reviews, security checks, and logic error detection - right in their IDE
- Run workshops, custom trainings, and hackathons on AI code quality, verification, and best practices
- Lead vibe coding sessions (not just docs) for anyone shipping AI-generated code - whether side project or production
- Share how kluster.ai catches bugs others miss - through blog posts, talks, social media, and community events
- Gather feedback from users and bring it back to the team, so we keep improving the platform for everyone

BASF

3 years 7 months

AI Augmented Software Engineering Advocate & AI Engineer

January 2024 - May 2025 (1 year 5 months)

Madrid, Comunidad de Madrid, España

Key Responsibilities:

- # Championing Gen AI tools and best practices among development teams
- Mentoring developers on leveraging Gen AI in software engineering
- Collaborating with product teams to integrate AI solutions into their projects
- Staying at the forefront of Gen AI advancements and emerging technologies
- Gathering and analyzing feedback to continuously improve our Gen AI tools and practices

Achievements:

- Organized an AI Automation Hackathon, with participants from 3 countries, identifying and gathering high-potential use cases across our division as well as providing knowledge and resources to our developers to explore the Gen AI potential. (2024)
- AI Ambassador to DoB (2025)
- Brand Ambassador (2025)
- More than 20M+ in savings due to AI automation. (2025)
- 1 Invention Patent (2025)

Developed and delivered comprehensive workshops and training sessions on:

- Advanced prompting techniques
- Retrieval-Augmented Generation (RAG)
- Latest Gen AI technology stacks
- Agentic Systems and Agents Orchestration

Created multiple Proof of Concept (POC) showcasing:

- Complex Agentic Systems
- Multi tool agents.
- Advanced RAG implementations
- Unstructured data extraction
- Optical Character Recognition (OCR)
- Speech-to-text and text-to-speech applications

Technical Proficiencies:

- Languages: Python, TypeScript
- Frameworks: Langgraph, Autogen, Crew AI, Semantic Kernel, LlamaIndex, Autogen, PyTorch, Langchain
- Cloud Platforms: AWS, AzureOpenAI, Google Cloud, Vertex

- Providers: NVIDIA, Anthropic, AzureOpenAI, OpenAI, Groq, Huggingface
- Models: OpenAI, Anthropic, Llama3+, Nemotron, Mistral, DeepSeek
- DevOps: Docker, Kubernetes, Azure

Soft Skills:

- Strong ability to translate complex AI concepts into actionable insights
- Collaborative mindset, working closely with developers to understand and address their needs
- Passionate about AI's potential to revolutionize software engineering

Full-stack Developer & AI Specialist

November 2021 - January 2024 (2 years 3 months)

Madrid, Comunidad de Madrid, España

Developing and supporting web applications for the Advanced Sustainability Project, which aims to help our customer reduce their carbon footprint.

Pioneering into merging AI Solutions into our current software

- Azure DevOps
- Pipelines, CI/CD/RM
- Node & NestJS
- Typescript
- Docker
- Angular
- SalesForce API integration
- Microservices Architecture

Docode

Full Stack Developer

August 2021 - November 2021 (4 months)

Valencia/València, Comunidad Valenciana / Comunitat Valenciana, España

Developing APP Web Services, API Rest

Tech:

- Angular & Ionic (iOS & Android)
- TypeScript
- MySQL & Mongo
- Node & Express
- Web Services, Rest
- Cloud (Digital Ocean) & Firebase
- Linux, SSH, Nginx

Trippers.app

Full-stack Developer

January 2021 - March 2021 (3 months)

Mónaco

Startup that allow users to organize trips with their friends, taking care of flight bookings, hotel reservations and itinerary.

- APP development using React Native

- iOS & Android Deployment

- API Rest calls

- Fully Remote position (Slack, Jira, git)

iTechCare

Fundador & CEO

April 2019 - July 2020 (1 year 4 months)

Madrid y alrededores, España

Startup project powered by EAE Business School

Developing a falling detection system for seniors citizens.

- Business development using Design Thinking

- Growth Hacking

- Agile & Scrum Methodology

Daimler Group Services Madrid

Back Office Analyst- Mercedes Benz France

December 2017 - May 2019 (1 year 6 months)

Madrid y alrededores, España

- Project development and internal process review.

- Error Detection, analysis, and coordination with IT departments across Europe & Asia

- AR with SAP

- Hackathon: First Prize for a Customer/Supplier Chat Interface powered by Artificial Intelligence

PRISTINE LETTINGS LTD

Director

June 2016 - November 2017 (1 year 6 months)

Bristol, Reino Unido

CAP ABODE LTD

Co-Founder

July 2014 - 2017 (3 years)

Go Green Export

Manager of Sales

March 2015 - June 2016 (1 year 4 months)
